PROFESSIONAL SUMMARY

Software Engineer with hands-on experience at Deloitte building full-stack, cloud-native applications with React, TypeScript, .NET, and Python. Dual AWS-certified, with specialized expertise integrating generative AI workflows (Amazon Bedrock, RAG) into production systems. Promoted from QA to Software Engineer within six months on the strength of technical delivery and adaptability.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C#

Frontend: React, React Native, HTML, CSS

Backend: .NET, Node.js, REST APIs

AI & Machine Learning: Amazon Bedrock, Retrieval-Augmented Generation (RAG), Prompt Engineering, LLM Integration, Foundation Models

Cloud & DevOps: AWS (Bedrock, SageMaker, Lambda, S3, API Gateway, CloudWatch), Azure DevOps, Git, GitHub, CI/CD; **Databases:** SQL, MongoDB, Vector Databases

Testing: Playwright, Postman, Selenium, Automated & Functional Testing

Methodologies: Agile, Scrum

PROFESSIONAL EXPERIENCE

Software Engineer *Mar 2025 – Present* **Deloitte & Touche LLP** | Nairobi, Kenya

- Promoted from QA Engineer to Software Engineer in six months, recognized for strong technical performance, adaptability, and consistent delivery in a cloud-native environment.
- Build and maintain enterprise web applications with React, .NET, and SQL on AWS (S3, Lambda, API Gateway), shipping 100+ features/releases supporting 10,000+ users across 28 Agile sprints.
- Design and integrate REST APIs and serverless microservices across AWS and Azure DevOps, reducing response time by 4-5s and improving overall application performance.
- Collaborate with product owners, developers, and QA in Agile teams to plan and deliver production-ready features, using AWS CloudWatch for live monitoring and reducing incident detection time by half.

QA Engineer *Sep 2024 – Feb 2025* **Deloitte & Touche LLP** | Nairobi, Kenya

- Designed and executed 150+ functional, regression, usability, and API test cases for Deloitte's Levvia SaaS auditing platform, hosted on hybrid AWS infrastructure.
- Supported QA for an enterprise SaaS platform (10,000+ annual users), validating secure data transmission across AWS S3 buckets and API endpoints.
- Automated browser-based regression suites in Playwright, validated AWS-hosted REST APIs with Postman, and tracked defects in Azure DevOps — cutting manual QA effort by 30% and reducing MTTR.

Frontend Developer *Oct 2022 – Aug 2024* **Rana Auto Selection**

- Built and maintained the company's customer-facing website in React, delivering a responsive, user-friendly experience for 1,000+ monthly visitors.
- Optimized React components and database interactions, cutting page load time by 40%.
- Used Git for version control and code review, maintaining code quality across an active development workflow.

Freelance Software Developer, *Nov 2020 – Sep 2022* **Self-Employed**

- Designed and delivered 10+ responsive web applications in React, JavaScript, and TypeScript for clients across various industries.
- Managed client relationships end-to-end — gathering requirements, scoping technical solutions, and delivering from concept to deployment.

SELECTED PROJECTS

Personal Portfolio Website — *React, TypeScript, Vite*

- Built a modern portfolio site with a reusable component architecture; applied professional Git workflows — feature branches, pull requests, and automated tests.

CERTIFICATIONS

- AWS Certified AI Practitioner
- AWS Certified Cloud Practitioner
- Frontend Developer Career Path — Scrimba

EDUCATION

Bachelor of Science in Applied Computer & Technology

United States International University – Africa | Nairobi, Kenya
